The screenshot shows a web application titled "E-Commerce SSR" with a sub-section titled "Daftar Produk". It includes a search bar labeled "Masukkan nama produk...", a dropdown menu for "Kategori" set to "Semua Kategori", a dropdown menu for "Urutan" set to "Urutan Terbaik", and a checkbox for "Urutan Terbaik" which is checked. Below the form is a thumbnail image of a beach scene with waves, labeled "Makanan & Minuman".

## Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

## NAMES AND LABELS

- ▲ Buttons do not have an accessible name ▾

- ▲ Select elements do not have associated label elements. ▾

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

## CONTRAST

---

- ▲ Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

## NAVIGATION

---

- ▲ Heading elements are not in a sequentially-descending order

These are opportunities to improve keyboard navigation in your application.

## BEST PRACTICES

---

- Identical links have the same purpose.

These items highlight common accessibility best practices.

## ADDITIONAL ITEMS TO MANUALLY CHECK (10)

[Show](#)

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).
